

Alma-P-Flex Class 1 (Italy)

PRODUCT MANUFACTURE: ALMA P-Flex is high resistance flexible ducting manufactured with self extinguisher polyolefin resins film with harmonic steel spiral wire between the layers of polyolefin resins film.

APPLICATIONS: The outstanding resistance, flexibility and lightness of the ALMA P-Flex ducting make it suitable also for the more demanding applications in the HVAC, airflow and gaseous fluid industries.

SPECIFICATIONS

Fire resistance	Class 1 (Italy)
Certification Giordano Institute	187718/RF4060 dated 23/09/2004
Omologation	MI2354C20D100005 dated 19/04/2005
Material	High resistance polyolefin resins film
Diameter ranges	from 82 mm to 635 mm
Internal working temperature ranges	-20°C + 100°C
Minimum curvature radius	0,6 x ø
Maximum air velocity	30 m/sec
Maximum working pressure	2500 Pa
Colour	Black
Standard length in single packing	10 m ± 2%
